Available now for a full-time role, remote or in Aguascalientes, Mexico (UTC−6). Spanish: Native. English: Intermediate (B1–B2): technical reading and conversation.

Summary

Full-stack developer with a B.Eng. in Software Development and Management, building web applications with React, Next.js, TypeScript, Node.js and SQL. At NEXA, the studio I co-founded, I built a bilingual business website with its own contact API and a working e-commerce prototype with checkout, accounts and order tracking. I also spent 20 months handling online orders for a dental supply company, so I understand the business side of the software I build.

Experience

Software Developer and co-founder | NEXA — Jan 2026 – Present
Web and software studio. Remote. Part-time, client projects

- Built the studio's bilingual website with Next.js 16, React 19 and TypeScript, including a contact API with rate limiting, bot protection and transactional email through Resend.
- Built a working e-commerce prototype for a handmade cosmetics brand: a 63-product catalog, cart with coupons, two-step checkout, customer accounts and order tracking with six statuses.
- Defined the phased technical scope for that store, turning catalog, purchasing and administration needs into front-end, back-end, data and UX deliverables.
- Designed normalized SQL Server data models and the initial REST API architecture with Node.js and Express, prioritizing data integrity and maintainability.

Sales and Customer Service Executive | Corporativo Dental Santander — Oct 2024 – Jun 2026
Dental supply distributor. Aguascalientes, Mexico. Full-time, alongside the last stretch of my degree

- Managed three stages of the online order lifecycle (customer guidance, payment reconciliation and shipping coordination), keeping every order traceable through delivery.
- Translated technical product specifications into clear buying guidance for customers.

Software Developer, professional practicum | Universidad Tecnológica de Aguascalientes — May 2025 – Sep 2025
SITO platform. Aguascalientes, Mexico. Required capstone placement of the engineering program

- Developed and maintained an internal report management system for the university's SITO platform over five months.
- Analyzed requirements and changed an existing CodeIgniter and PHP codebase, using Git for version control.

Selected projects

Volviendo al Origen, prototype for a client proposal. Next.js 16, React 19, TypeScript, Tailwind CSS 4, Zustand
vao-demo-nexa.netlify.app | github.com/renerangelb-bit/volviendo-al-origen-demo

NEXA website, live. Next.js 16, React 19, TypeScript, Tailwind CSS 4, Resend, Cloudflare Turnstile, Netlify
nexastudiohq.com | github.com/renerangelb-bit/nexa-studio

Environmental monitoring app (Academic project, TSU). Kotlin, Android, Firebase, Arduino, Raspberry Pi

Employee management system (Academic project). Java, Spring Boot, SQL

Skills

Front end: React 19, Next.js (App Router), TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Zustand, Vite, Angular

Back end and data: Node.js, Express, REST APIs, SQL Server, Relational modeling, MongoDB, Java, Spring Boot, PHP, CodeIgniter, Python

Mobile and IoT: Kotlin, Android Studio, Firebase Realtime Database, Arduino, Raspberry Pi

Tools and services: Git, GitHub, GitHub Actions, Postman, Netlify, Resend, Cloudflare Turnstile

Education

Universidad Tecnológica de Aguascalientes
B.Eng. in Software Development and Management — Jan 2024 – Sep 2025
University Technician (TSU) in Multiplatform Software Development — Jan 2021 – Dec 2023
